Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 44-47,49-51 and 53 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 53 is directed to a computer implemented method for perform calculations. In order for such a computer related invention to be statutory, the claimed invention must accomplish a practical application. That is the claimed invention must transform an article or physical object to a different state or thing, or produce a useful, concrete and tangible result. State Street, 149 F.3d at 1373-74, 47 USPQ2d at 1601-02. Also see "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility", OG Notices: 22 November 2005. It is clear that the claims merely involve calculations and manipulations of data in performing computations. The claimed invention does not transform an article or physical object to a different state or thing. The inputs are numbers and the outputs are also numbers. The result produced by the invention is a mere numerical value without a practical application recited in the claim that make the useful, concrete and tangible. Therefore, the claimed invention is directed to non-statutory subject matter as the claimed invention fails to accomplish a practical application. The rejection may be overcome by providing a practical application for the result such as the last step of claim 12, e.g.

Claims 44-47,49-51 are directed to a memory encoded with non-functional descriptive

material including merely fix-point values and their properties, and thus are also directed non-statutory subject matter. The objects encoded in the memory as recited the claims are mere data indicating values or property. These objects do not cause a computer to perform any function, and thus are non-functional descriptive material which is non-statutory subject matter.

3. Claims 48 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
